

Associate Director of the Center for Humanities and Information, University Park

The Pennsylvania State University Libraries invites nominations and applications for the position of Associate Director of the Center for Humanities and Information (CHI), a new research center jointly managed and run by the Libraries and the College of Liberal Arts (CLA). This is a twelve-month, tenure-track, library faculty position based at the University Park campus, and will report to an Associate Dean in the University Libraries' administration.

The successful candidate will have a background in the humanities and a broad and sophisticated understanding of the digital scholarship landscape. The Associate Director will embrace an expansive, integrative view of research practices, methodologies, outputs, and dissemination modes in the spirit of interdisciplinary scholarly inquiry. A key responsibility will be to co-direct CHI projects in collaboration with the Center's leadership and provide strategic and practical oversight for a newly conceived Digital Humanities Lab (DHL), an exciting new initiative of the University Libraries that will provide opportunities for faculty and students to engage in digitally enriched humanities scholarship and pedagogy. The Associate Director will be expected to lead, design, plan, and implement a service and program model for the Lab in collaboration with colleagues in the Libraries and the CLA.

The Libraries' Associate Director will be one of three roles leading CHI; the other partners are the Center's Director and an additional Associate Director, both of whom also are teaching faculty in Liberal Arts. Because of the Center, the Lab, and the Libraries' continuing vibrant partnership with the College of Liberal Arts, the Associate Director role presents a unique opportunity - a chance to make a transformative difference in the operations, research activities and services, promotion and outreach initiatives, and strategic vision for the humanities and digital scholarship at Penn State.
